Chemidose Limited is an established company since 2004 based in the South of England specialising in all aspects of water treatment gaseous and liquid chemical dosing.

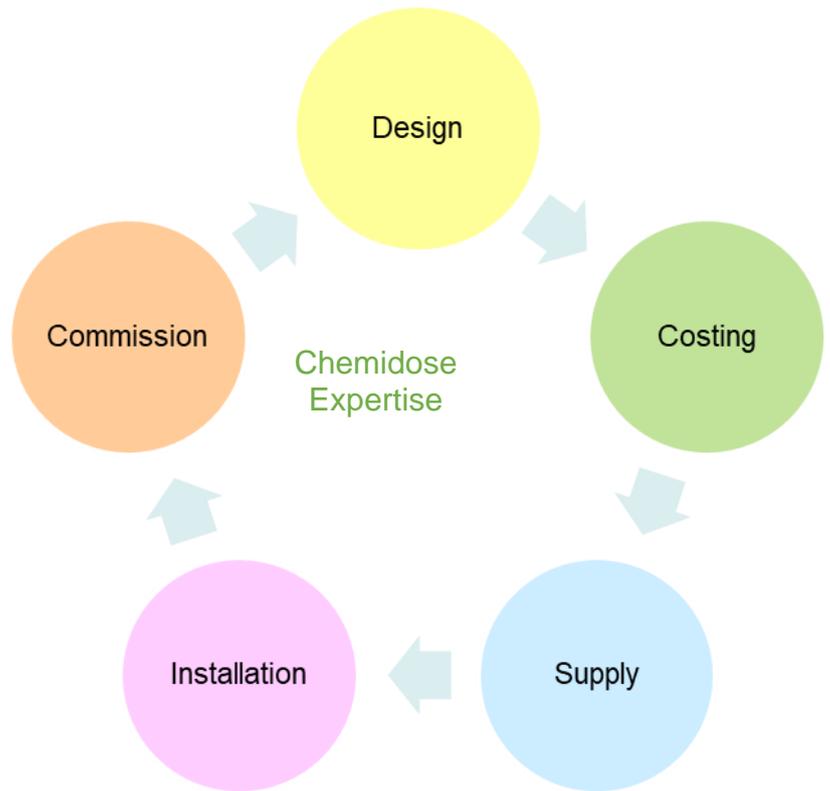

With an impressive portfolio of products, installations and customers, Chemidose Limited are able to offer a safe and cost-effective solution to your water treatment chemical dosing needs.

Working with...

... and many more

Chemidose are able to provide full support on all the key areas of your water treatment chemical dosing requirements, from design through to installation and commissioning. Chemidose can carry out site surveys, provide detailed, cost effective best practice design solutions for all your liquid, gaseous and powder chemical dosing applications. With many years experience and an impressive list of satisfied customers, Chemidose are perfectly positioned to provide a proven solution for your water treatment requirements.

Examples of recent projects include

Southern Water – Sandown WSW

Design, supply, install and commission a new Sodium Hypochlorite, Sodium BiSulphite, Poly Aluminium Chloride and Polyelectrolyte dosing skids, pipework, valves and fittings for Barhale Trant Utilities.

Affinity Water – Blackford WTW

Design, supply, installation and commissioning of a fully client specification and WIMES standard duty/standby Sodium Hypochlorite Dosing system within an LCP3 security rated Kiosk and with associated Civil Works, and to replace and remove an ageing OSEC plant.

South East Water – Crowhurst Bridge WTW

Design, supply, installation and commissioning of a new gaseous Chlorination and Sulphur Dioxide vacuum drum changeover and gas feed automatic dosing system with associated gas vacuum lines and dual contained chemical solution lines with leak detection boxes.

Northern Ireland Water – Castle Derg WTW

Design, supply, installation and commissioning of a new duty/standby 96% strength Sulphuric acid solution for Enisca.

For further information, or if you have a project you wish to discuss, please feel free to contact us.
